Ministre des Richesses Naturelles et des Forêts

SCHEDULE A

1. Dust will be mitigated on site.
2. Water or another provincially approved dust suppressant will be applied to internal haul roads and processing areas as often as required to mitigate dust.
3. Processing equipment will be equipped with dust suppressing or collection devices, where the equipment creates dust and is being operated within 300 metres of a sensitive receptor.
4. Any recommendations and/or recommended monitoring program identified in the technical reports will be described on the site plan and all records will be retained by the licensee and made available upon request by the Ministry of Natural Resources and Forestry for audit purposes.
5. A Spills Contingency Program will be developed prior to site preparation.
6. Fuel storage tanks will be installed and maintained in accordance with the Liquid Fuels Handling Code under the Technical Standards and Safety Act, 2000.
7. If required, a Certificate of Approval will be obtained for the discharge system should water be discharged off site.
8. If required, a Certificate of Approval will be obtained for processing equipment to be used on the site.
9. If required, a Permit to Take Water will be obtained for utilizing ground and/or surface water.
10. The licensee will monitor all blasts for ground vibration and blast overpressure and will operate to ensure compliance with current provincial guidelines.
11. Blasting will not occur on a holiday or between the hours of 6 p.m. on any day and 8 a.m. on the following day.
12. All blast monitoring reports must be retained by the licensee and made available upon request by the Ministry of Natural Resources and Forestry for audit purposes.
